Loughlin Statement on May Employment Statistics

John Loughlin, Republican candidate for Congress in RI-1 today released the following statement:

"The most recent jobs report is another reminder of how much work remains to be done to put people back to work. It's disappointing that almost all the new jobs created in the month of May are attributable to the hiring of temporary government census workers," said Loughlin. "Our economy won't recover until we achieve meaningful job creation in the private sector. The best way to do that is to keep taxes low and adopt pro-growth policies that will encourage businesses to expand and add more workers."
