## **Statement by John Loughlin on Record Federal Spending**

John Loughlin, Republican candidate for Congress in RI-1 today released the following statement:

“Today the U.S. Census Bureau reported that federal spending increased a record 16% to \$3.2 trillion in 2009. Like all Americans, I’m shocked by the amount of money our government is spending. Instead of adding jobs, the only thing this new spending has added is more debt. We need to set a new course for America that keeps the size of government in check. Otherwise, we’re sticking our children and grandchildren with a bill they can never afford to pay.”
